Of the Carolinas, Inc.

COMPANY PROFILE

Construction Adhesives Bonding, Inc. (CAB), a general contracting company founded in 1978, has successfully completed more than 3300 structural improvement and protection projects in the United States and abroad. The partners of CAB have over 100 years' experience in structural restorations. This experience has earned us the reputation as a leader in the commercial, industrial and public markets. Consequently, we have expertise in the highly specialized techniques applicable to structural repair, property enhancement and protection.

The skills and experience to repair damaged or deteriorated structures are decidedly different from those required to build new structures. With new construction, established procedures yield predictable results. In repair, however, many variables, risks and complex challenges make each repair project unique. These factors demand a contractor who has extensive specialty repair experience, has performed a wide variety of repair methods and has proven field procedures. As a result of our experience, clients are assured of effective, long lasting repairs.

Our commitment to quality and safety are paramount to our success. CAB delivers cost-effective, quality-conscious service while executing projects in a safe and professional manner with minimal disruption of day to day facility operations. Regardless of project size, one day emergencies to multi-year contracts, our repair experience enables us to anticipate and minimize inconveniences associated with repair projects.

Equality, this commitment and attention to detail is carried through in the performance of every CAB employee. Quality, integrity and reliability are the mainstays of our business approach and ensure that CAB delivers a successful project to our customers. As a result of the philosophy for personal commitment, the number of CAB projects is limited to ensure that the customers receive the best possible service. We do not strive to be the biggest, only the best.

Of the Carolinas, Inc.

COMMERCIAL SERVICES

Our commercial services include a broad range of contracting skills that allow our clients the freedom to exercise the best possible solution required to achieve the project goals. We provide each client with a comprehensive response to solving and working through potential situations before they occur. This insight has gained our company the reputation as a leader in providing our clients with accurate information, timely construction and the most current technology.
